CONTRIBUTE TO OUR NEWSLETTER

In a new ICS effort to help distribute information about the broad field of carotenoids, we would like to gather pertinent information from the ICS members for each issue of the newsletter. We suggest three sections in which you could contribute, although we can consider including others: 1. Carotenoids in the News (manuscripts, outstanding findings, or grants), 2. Job Announcements (job openings related to carotenoid research), and 3. Ongoing Special Issues. If you would like to share something with the ICS members, please [email us](#) before mid-June.
